

VISHNUVARDHAN REDDY SALIMIDI

Email: reddy.vishnu.rv@gmail.com

LinkedIn: [vishnuvardhan-salimidi](#)

Mobile no: +1(281)904-2836

PROFESSIONAL SUMMARY:

Software Engineer with 7+ years of experience designing, developing, and deploying scalable enterprise applications using Java, Spring Boot, Microservices, Angular, React, REST APIs, and SQL. Expertise in cloud native development on AWS and GCP, CI/CD pipeline automation, and application performance optimization. Experienced in modernizing legacy mainframe systems and delivering quality solutions in Agile, client facing environments.

TECHNICAL EXPERIENCE:

Frontend: Angular 18, React 16, JavaScript, TypeScript, HTML5, CSS3.

Backend: Java 11/17, Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, REST APIs, Microservices.

Cloud & Platforms: AWS (EC2, S3, RDS, Lambda, SQS, SNS, Secrets Manager, EKS), GCP, Pivotal Cloud Foundry.

Databases: Oracle, PostgreSQL, MySQL, MongoDB.

DevOps & CI/CD: GitHub Actions, GitLab CI/CD, Jenkins, Docker, Kubernetes.

Messaging & Caching: Kafka, Memcached.

Testing & Quality: JUnit, Mockito, Selenium, Jest, Postman, SonarQube.

Monitoring & Tools: ELK Stack, Kibana, JIRA, Swagger, IntelliJ, Eclipse.

PROFESSIONAL EXPERIENCE:

Senior Software Engineer | Virtusa | Texas, USA

Dec 2023 – Present

Client: Amazon Web Services

Technologies: Java 17, Spring Boot 3, Angular 18, AWS (EC2, S3, RDS, SQS, SNS, Secrets Manager), Natural Mainframe, Docker, Tomcat 10, JProfiler, SQL Developer, Git, IntelliJ, Eclipse, JIRA, Quip.

Responsibilities

- Modernizing large scale Natural mainframe applications into Java Spring Boot 3 and Angular 18 using AWS BluAge Velocity.
- Designed and implemented modern code for Natural statements such as EXAMINE, BACKOUT and END TRANSACTION.
- Developed RESTful microservices using Spring Boot 3 with optimized SQL based data access layers.
- Built Angular components, services, routing modules, and reusable UI components for modernized workflows.
- Performed transformation analysis, resolved modernization defects, and generated intermediate state machine files.
- Improved system performance through query optimization, indexing strategies and Profiler profiling, reducing response times to under 6 seconds. Reduced the Angular application build time by 85%.
- Deployed applications on Standalone Tomcat (Windows & Linux) and managed environment specific configurations.
- Integrated SonarQube to identify and fix security vulnerabilities and maintain code quality.
- Configured and maintained CI/CD pipelines using GitHub Actions and Jenkins.
- Worked closely with stakeholders in Agile sprints, conducting code reviews and delivering milestone based releases.

Software Developer | Sans Solutions Enterprise INC | Houston, Texas

Sep 2023 – Nov 2023

Project: Perfonova (Project Management Platform)

Technologies: Java 11, Spring Boot 3, Angular, PostgreSQL, AWS, Microservices, Git, GitLab CI/CD, VS Code, STS, Postman, Kubernetes, Memcached, JUnit, Mockito, Jest.

Responsibilities

- Developed full stack features for Perfonova, a project management platform, using Angular and Spring Boot 3 microservices.
- Designed modular UI components with routing, services, dependency injection, and reusable layouts.
- Implemented backend business logic, data modeling, and PostgreSQL integrations.
- Wrote unit tests using Jest (frontend) and JUnit/Mockito (backend) to ensure application stability.
- Maintained CI/CD pipelines using GitLab, publishing builds to Artifactory.
- Worked with Kubernetes and Memcached to improve caching and system reliability.

Software Engineer | Open Text | Hyderabad, India

Mar 2023 - Aug 2023

Technologies: Java 11, Spring Boot 3, Spring Batch, React 16, Microservices, PostgreSQL, GCP, Liquibase, Swagger, JUnit, Mockito, Kubernetes, Istio Service Mesh, Memcached, GitLab, Selenium.

Responsibilities

- Developed frontend modules for **Core Case Management (multi-tenant)** using React 16 with hooks and reusable components.
- Built scalable backend microservices using Spring Boot, Spring Data JPA, and PostgreSQL.
- Implemented secure API validation and data sanitization using OWASP HTML Sanitizer to prevent XSS attacks.
- Improved application performance by integrating Memcached caching, reducing database load and latency.
- Migrated applications from Cloud Foundry to GCP using Spring Batch and shell scripts.
- Used Istio Service Mesh for securing service to service communication in Kubernetes clusters.
- Performed automation and REST testing using Selenium, Postman, and Swagger.

Application Developer | IBM | Hyderabad, India.

Aug 2021 – Mar 2023

Client: First Abu Dhabi bank

Technologies: Core Java, Spring Boot 2 & 3, Microservices, Oracle, PostgreSQL, AWS (EKS, SQS, SNS, Secrets Manager), React, MongoDB, Kibana, ELK, GitHub Actions, Swagger, STS, Putty, WinSCP.

Responsibilities

- Developed backend services for Internet & Mobile Banking platforms using Spring Boot microservices and REST APIs.
- Built React UI modules with hooks, state management, and component-based architecture.
- Integrated upstream banking systems and resolved complex transaction level issues.
- Performed SIT, UAT, and integration testing for all release cycles.
- Used AWS EKS, SQS, SNS, and Secrets Manager for secure deployments.
- Configured CI/CD pipelines using GitHub Actions and monitored production logs using ELK & Kibana.
- Improved microservice performance by implementing Kafka for asynchronous messaging and Memcached for caching.

Project Engineer | Wipro Technologies | Bengaluru, India

May 2018 – May 2021

Client: Hewlett Packard Enterprise. (HPE-AMS)

Technologies: Core Java, Spring, Hibernate, REST APIs, Oracle WebLogic, Tomcat, SVN, Jenkins, GitHub Actions, SQL, Batch Scripts

Responsibilities

- Developed backend modules for HPE configuration and quotation systems using Java, Spring, Hibernate, and REST APIs.
- Automated SOX reports and system notifications using SQL and Java schedulers.
- Migrated applications from SVN to GitHub and configured Jenkins pipelines.
- Automated WebLogic instance restarts and monitoring, reducing downtime.
- Supported migrations from on-premises systems to private cloud infrastructure.
- Participated in Agile meetings and delivered enhancements across multiple applications.

EDUCATION:**KL University | Guntur, India**

2018

Bachelor of Technology in Computer Science & Engineering

GPA:8.41/10

PAPERS AND PUBLICATIONS:

- Presented a paper on “**Outlier Detection in Data Streams using MCOD Algorithm**” at IEEE conference (iCATccT 2017).
- **Technologies:** R programming, MOA tool.
- <https://ieeexplore.ieee.org/document/8389156>

CERTIFICATIONS:

- L3 Certified **AWS Blu Age Refactor**. Jan 2024
- Completed **AWS Developer Associate** Certification (DVA-C01). Jun 2022
- Completed the **AWS Certified Cloud Practitioner** Certification (CLF-C01). Nov 2021
